DETAILED ACTION

Claim Rejections - 35 USC § 102—Withdrawn

1. Claims 1-3, 5, 6, and 10 were rejected under 35 U.S.C. 102(b) as being anticipated by Japanese Patent document 3-261142. Applicant has amended the claim to recite that the substrate is an IC semiconductor, which is not analogous to a vehicle. Applicant has also indicated that the polymer is curable which is not disclosed in the currently pending rejection. Further a strippable film, as pointed out by applicant is not the same as melting ice.

Claim Rejections - 35 USC § 103—Withdrawn

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 4 was rejected under 35 U.S.C. 103(a) as being unpatentable over Liu and Bodet. Claim 1, is allowable, as indicated above, as such the dependant claim 4, is similarly allowable, for at least the same reasons.

3. Claims 1-3, 6, 7, 10, and 26 were rejected under 35 U.S.C. 103(a) as being unpatentable over Lee and United States Patent No. 5,120,369 to Malotky. Malotky is drawn to the removal of hazardous material from vehicles, the invention is drawn to semiconductor wafers.

Allowable Subject Matter

1. Only claims 1-6 and 26 are currently pending. Claims 1-6 and 26 are allowed and have been renumbered as claims 1-7. The following is an examiner's statement of reasons for allowance:

2. The claims as amended, when taken in conjunction with the propounded arguments are believed to distinguish the present invention from the prior art of record. It is noted that the designation of the substrate is meaningful in distinguishing the present claims, and also important is the introduction of the limitation that the polymer is curable, and the film is finally stripped off. Because the prior art of record apparently fails to identically disclose the present invention the invention is believed to be novel. Furthermore, while the aggregated references disclose the claimed features, sufficient motivation for making the claimed combination is lacking, and thus the invention is believed to be non-obvious over the prior art of record. Finally, applicant's amendments and arguments, when taken together with this examiner's Official actions are believed to provide a fairly clear record of exactly what the prior art of record contains and how the instant claims are distinguishable.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
